

## Instructions

The door strips can be applied to any flat surface (wood, plastic and metal) and easily cleaned with a damp cloth.

The strips can also be screwed into place through the grooves in the edging of the strips every 30 cm. If the door or doorframe has water-based paint the strips must be screwed into place.

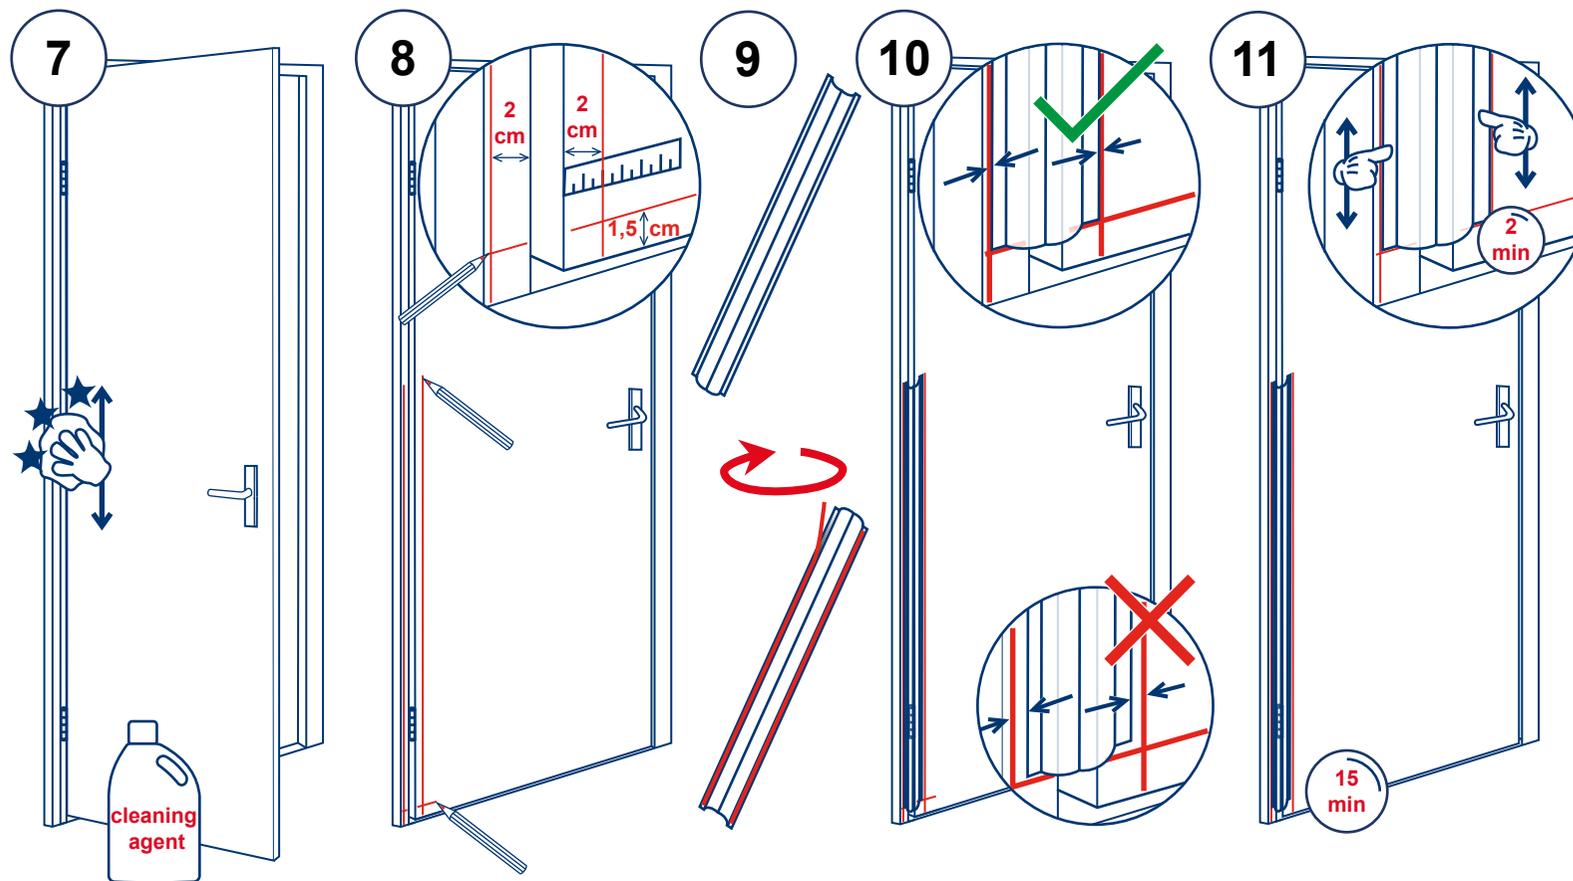

Check the strips to ensure continued strong adhesion regularly at a minimum of every 3 months beginning the third month after installation.

### DISCLAIMER

Arte Viva BV shall not be responsible for any consequential, direct or indirect loss or damage suffered by any person or property, which is the result of a failure to install and/or use the strips as set forth in the above instructions, or based upon misuse, neglect or modification of the Finger Alert strips.

Do not open doors fitted with Finger Alert strips more than 110°, it would be likely that the strip will tear off from the door.

Removing the adhesive strips may cause damage to surface finishes and paintwork. To prevent damage, the strips must be pulled off carefully, lengthwise, at a 90° angle from the door or use hair dryer.

Install door stoppers if necessary to avoid damage to the door and doorframe.
